AB 2-Aminoazoles were transacylated by heating in an inert solvent with an N-acylazole to give N-acyl-2-amino(or imino)azoles, which underwent rearrangement to give 2-(acylamino)azoles. Thus, benzimidazole I (R = R1 = H) (II) was heated 15 min in THF with 1-(ethoxycarbonyl)imidazole to give 87% I (R = CO2Et, R1 = H). II was heated in PhMe with 1-(isopropoxycarbonyl)imidazole to give 70% I (R = H, R1 = CO2CHMe2).
